

As the PSAP Communications Manager of a progressive county located in the North Texas area, **I am in support of text to 911.** Technology is ever changing with functionality and features and the 911 community should be progressing along with it. Our citizens should be able to use a texting as a communication tool in the times of emergencies. 911 centers acclimated to receiving TDD/TTY calls via the 911 communications equipment with ease and texting to 911 would follow the same suit.
